15 EXPERT TIPS TO REFRESH & RE-ENERGISE

ONE SMALL THING:

DRINK ... WITH A CLEAR CONSCIENCE

That \$2.50 bottle of water may seem harmless, but it's actually doing more damage than you think – to our environment and your hip pocket. Saving 60,000 tonnes of greenhouse gas emissions is the same effect as taking 13,000 cars off the road each year. We were shocked to learn that a litre of bottled water is often more expensive than a litre of petrol (90% of what we pay goes towards the bottle, label and lid) and yet there are no studies to show that it's any healthier than tap water. The solution? Filling a reusable bottle with tap water each day is one of the simplest ways to make an immediate difference. We love the new Bobble bottle (pictured, \$14.95) designed by Karim Rashid. It filters water instantly and is made from recycled plastic, so you can stay hydrated with a clear conscience and spare change in your wallet.

~ Anna Koorey

Did you know...

IF EVERYONE SWITCHED TO REFILLABLE BOTTLES, WE COULD SAVE A STAGGERING 60,000 TONNES OF GREENHOUSE GAS EMISSIONS ANNUALLY

Would you rather ...

HOLIDAY IN HAWAII OR BUY A BOTTLE OF WATER EACH WEEK DAY? IF YOU DIDN'T BUY BOTTLED WATER FOR A YEAR, YOU'D SAVE ABOUT \$650 – THAT'S MORE THAN A RETURN FLIGHT TO HONOLULU!
